## EUCHNER – A leader in Machinery Safety Engineering Training

By attending an EUCHNER approved training program you will strengthen your skills, knowledge and competency of industrial machinery-safety. In addition to the theory many EUCHNER courses are often backed up with hands-on practical sessions, leading to a greater level of understanding compared to other purely academic programs.

As well as gaining the valuable skills you require for your role, through your attendance on an EUCHNER training course, you are also helping to promote a safer workplace for everyone.

Along with the standard courses offered we can also tailor-make bespoke courses to suit the individual needs of your organisation. Please contact us for more information:
